Portfolio

Task Requirements:

1. Navigation Bar (Navbar)
    -A fully responsive navigation bar.
    -Easy access to all sections of the portfolio from the navbar.

2. Designation and Introduction
    -Display your professional designation (e.g., Frontend Developer, Web Developer, Full Stack Developer, etc.).
    -Include a professional photo of yourself.

3. Resume Download Button
    -A clearly visible button in the hero section that allows visitors to view and download your resume with a single click. (**Resume will be downloaded if your resume is ready. If it is not ready, for now, you can just keep the clickable button.**)

4. Social Links
-Embed buttons linking to your relevant social media profiles (e.g., GitHub, LinkedIn, Twitter, Facebook).

5. About Me Section
-Write a detailed introduction about yourself, including:
    -Your programming journey.
    -The type of work you enjoy.
    -Any hobbies or interests outside of programming (e.g., sports, painting).
    -Showcase your personality in this section.

6. Skills Section
    -Display your skills in a visually appealing graphical format.
    -Categorize skills if necessary (e.g., Frontend, Backend, Tools).

7. Educational Qualification
    -Mention your educational background in detail if you have completed education above HSC.

8. Experience (If Applicable)

-Add relevant professional experience, if available.

9. Projects Section (At Least 3 Projects)
-Showcase at least three of your best projects in card format.
-Each project card must contain:
-Project name
-Project image
-"View More / Details" button
-Clicking the "View More / Details" button should lead to a detailed project page containing:
-Main technology stack used
-Brief description
-Live project link
-GitHub repository link (only client)
-Challenges faced while developing the project
-Potential improvements and future plans for the project

10. Contact Information
-Provide an easy way for visitors to contact you directly.
-Include:
-Email address
-Phone number
-WhatsApp number (optional)

11. Footer (Optional)
-A simple and elegant footer can be added for better presentation.

12. Responsive and Clean UI for All Devices
-Ensure full responsiveness across all screen sizes (desktop, laptop, tablet, mobile).
-Choose a polished and professional color scheme.

****You can use any technology to build the proper portfolio. But all the requirements must be completed.****

Submission Requirements:

-The website must be hosted, and a live link should be provided. Please ensure that the live link is working. Otherwise, you will be given 0.
-Ensure a clean and structured design following the above-mentioned points.
